This is UNEVALUATED Information

THE SOURCE EVALUATIONS IN THIS REPORT ARE DEFINITIVE.
THE APPRAISAL OF CONTENT IS TENTATIVE.
(FOR KEY SEE REVERSE)

1. The appended table lists planned 1955 gross production in measurement values (Messwerten) and in terms of thousands of DM of all enterprises under the Main Administration for Radio and Telecommunications Technology (HV MFT) of the East German Ministry for Machine Construction. This information is given for the entire year and for the four individual quarters of 1955. The table furthermore lists that part of the planned 1955 gross production which is covered by orders already placed: this information is given for the entire year and for the first quarter of 1955. In addition, the table lists that part of the 1955 gross production which is expected to be covered during the course of the year although no definite orders have as yet been placed. It is, however, definitely expected to be covered because informal requests for production have been received from customers. Finally, the table lists the "free" part of planned 1955 production, i.e. that part of it which is not covered by orders already placed or expected to be placed. In those cases where planned production exceeds production covered and/or expected to be covered by orders, the "free" production is preceded in the table by a minus sign. In the few cases where orders and expected orders exceed the planned production, the excess is preceded by a plus sign. 25X1

2. The following indications will help in understanding the table:

   a. Planned 1955 gross production for the entire year as well as the four quarters of 1955 is listed under column A;

   b. Planned 1955 gross production which is covered by orders is listed for the entire year and for the first quarter of 1955 under column B;

   c. Planned 1955 gross production not yet firmly covered by orders but expected to be covered is listed under column C;

   d. Unplanned free production (preceded by a minus sign) and excess over planned production (preceded by a plus sign) is listed under column D;

25X1

e. The sum of the absolute figures in columns B,C and D equals planned 1955 gross production. The sum of the figures in columns B and C less the absolute figure in column D also equals planned 1955 gross production.

1 Comment. In the meantime, the Ministry for Machine Construction has been split into two new Ministries (for General Machine Construction and for Heavy Machine Construction.) The attached list is based on the old Ministry organization. One of the results of the new organizational scheme is that the Funk-und Fernmeldeanlagenbau enterprises listed in this table no longer belong to HV RFT.
